

# **Life Line Vascular Screenings**

**Yerington Vineyard Fellowship is hosting community vascular screenings on Tuesday, March 23<sup>rd</sup>, 2010.**

**Stroke (Carotid Artery Disease), Vascular Disease (AAA and PAD screenings), and Heart Rhythm Package - all 4 tests for only \$139. Add an osteoporosis screening for \$10 more; all 5 tests for \$149!**

Millions of men and women 45 and older are at risk for vascular disease and stroke. Stroke is the 3<sup>rd</sup> leading cause of death in the U.S. and approximately 80% have no apparent warning signs of onset. The vascular screening exam is a quick, painless, non-invasive test designed to help protect you from:

- PERIPHERAL ARTERY DISEASE (PAD)
- CAROTID ARTERY DISEASE
- ABDOMINAL AORTIC ANEURYSM (AAA)
- ATRIAL FIBRILLATION

Early detection of vascular disease can prevent serious and even fatal outcomes. State-of-the-art equipment is used with sophisticated color-flow Doppler ultrasound technology, and a board-certified physician reviews the screening results that will help you and your physician manage your wellness.

## **Who should be screened?**

Men and women over 45 who have at least one risk factor for vascular disease - inactivity, obesity, diet high in saturated fat, smoking, high blood pressure (or on medication) high cholesterol (or on medication), cardiovascular disease, pulmonary disease, diabetes, family history of stroke or AAA.

**By appointment only! Call 800-324-1851 to pre-register or log on to [www.lifelinescreening.com](http://www.lifelinescreening.com) and use priority code HSC6302**
